Prepare for Traffic Delays

Ranch Road 12 Traffic Switch Planned for May 20

As part of phase four of the \$26.38 million Wonder World Drive extension project, the City of San Marcos plans to switch traffic from the current Ranch Road 12 detour configuration to new pavement on May 20, 2010, weather permitting.

The detour plan will include moving both westbound and eastbound traffic onto the new roadway constructed for the permanently rerouted Ranch Road 12 and West Wonder World Drive intersection configuration.

Stop signs and overhead illumination will be utilized at the new intersection to enhance roadway

safety and reduce traffic speed. Motorists are advised to expect delays as traffic is rerouted.

Construction on the City's largest transportation project in history is progressing on schedule with the West Wonder World Drive extension expected to open in July and the Craddock Avenue extension expected to open in the Fall.

The West Wonder World Drive extension will be a 3.2 mile, four lane limited access divided parkway from Hunter Road to Ranch Road 12 and will provide a direct link to I-35.

The road will improve traffic flow to and from western Hays County and will relieve the downtown area and many residential neighborhoods of heavy truck and through traffic.

For more information on this project, call the City of San Marcos Capital Improvements Department at 512.393.8130.
